

## ***LPs, Reel-To-Reel Tape, & Cassettes Backed Up to CD***

If you have old audio recordings on audio cassettes or LP, well as reel-to-reel audio tapes that you can no longer play because you no longer own that type of equipment, let Foster Video create backup copies on CDs. We can also capture the audio from the following videotape formats: vhs, s-vhs, vhs-c, s-vhs-c, 8mm, HI8, D8, mini DV. If your audio is longer than 80 minutes (the capacity of 700 MB disc) we'll continue the audio on another disc. Prices are for one source, audio cassettes, LP, or reel-to-reel audio tapes. We can also divide the audio into separate tracks. We also can combine different audio sources into one CD, or removed or rearrange part of the audio, or any combination or scenarios.

### **Three-step Process**

We use a three-step process, capturing, editing, and burning to disc. The audio is captured at a higher than CD quality (48,000Hz) the audio is then divided into the appropriate tracks. At this point the tracks are imported into an authoring program or the files are recompressed to the CD standard (41,000Hz sampling rate). Prices may vary depending on the level of service we provide on a given transfer project. Prices include transfer, 700MB 80 minute CD-R disc, and black on-disc printing, slimline CD case (color printing is extra)

**Note:** it is recommended that you only backup tapes and records that are not commercially available on CD. New releases of old records albums usually have been digitally re-mastered and are better quality than the original

***Prices include, 700MB 80 minute CD-R disc, and black on-disc printing***

Run Time	1 Copy	2 to 4 Copies B & W	2 to 4 Copies Color	Track marking
Up To 20 Min	<b>\$10.00</b>	<i>\$4.95 Each, black on-disc printing</i>	<i>\$5.15 Each, near photo Color quality printing</i>	<i>\$0.95 Each, splitting audio into separate tracks</i>
